7000 Series Proprietary Telephones

The KX-T7000 Series proprietary telephones are designed for use with Panasonic Hybrid Telephone Systems KX-TA624 and KX-TA1232, but can be used with our Digital Super Hybrid Systems as well. This upward compatibility is a plus for growing businesses who might want to upgrade to a digital system in the future without the expense of new phones. Choose from a wide variety of features to suit each employee's needs.

Flexible Central Office (CO) Line Buttons enable you to individually program each telephone for either Direct Station Selection (DSS)/Busy Lamp Field (BLF), automatic dialing or one-touch access to the feature each employee uses most often.

An **Auto-Answer Speakerphone** is a valuable asset when it comes to increasing efficiency. Featured on the KX-T7020, KX-T7030 and KX-T7135, this handy speakerphone lets you set the phone for automatic hands-free answering of intercom calls. Just imagine! Your employees will no longer need to interrupt their work flow just to answer the phone.

The **Multi-Purpose, Alphanumeric LCD Readout** on the KX-T7030 and KX-T7130 shows time, day, month, dialing number, and call duration of external calls. On intercom calls, the caller's extension will appear before the phone is answered.

Plus when used with the KX-TA624 and KX-TA1232 systems or one of our Digital Super Hybrid Systems, the display also shows Caller ID information for outside calls. The KX-T7135 has a backlit display making it easy to locate the phone and read the display in a dark room. The LCD readout can even help you program the system right from the phone via visual prompts.

Additionally, all Panasonic KX-T7000 Series phones come with an ergonomically designed **K-Type Handset**. This full-sized, evenly weighted handset is the industry model for comfort and ease of use.

For an efficient communication system with the flexibility to adapt as your office grows, choose Panasonic 7000 Series phones.
